EX PARTE QUAYLE

1. This application is in condition for allowance except for the following formal matters:

- The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. The following title is suggested: **Image Processing Apparatus which Reduces Noise by Adjusting the Transition Timing**.
- Figures 4-9 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

Art Unit: 2612

2. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the primary reason for allowance is that the prior art fails to teach or reasonably suggest performing adjustment such that the timing of data transition of a particular bit in a bit array indicating a horizontal retrace period of the digital format video signal does not overlap with a period for sampling the feed-through period and the photoelectric conversion signal period in the correlated double sampling circuit.

Regarding claim 9, the primary reason for allowance is that the prior art fails to teach or reasonably suggest an adjustment circuit that performs adjustment such that transition timing in a case where the amount of transition of the plural bit signal outputted from the parallel output circuit is greater than a predetermined value does not overlap with the timing of the sampling the analog signal from the image sensing device in the sampling circuit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John M. Villecco whose telephone number is (703) 305-1460. The examiner can normally be reached on Monday-Thursday.
